Native

EXPERIENCE

Software Engineer
QIMA   Jan/2024 - Jul/2024
Collaborate with an international team synchronously and asynchronously to develop a new solution for issuing OGC/TC, the Tech lead and I designed the solution, which was implemented with Angular and Quarkus

Senior Developer
Mirante Tecnologia   May/2023 - Dec/2023
Migration of legacy Spring card services to microservices and development of new proprietary libraries for a bank. I was hired to finish migrating the remaining legacy services related to card issuing and transactions.

Tech Lead
MamInfo   March/2022 - May/2023
Development and delivery of a post-sales platform, infrastructure definition and implementation, CI/CD pipelines, code review, project management, mentoring, and supervision of developers during the project.

Senior Developer
Compass.uol   Oct/2021 - Feb/2022
Migration of all remaining legacy Spring ATM services to microservices using Spring Boot, Kafka, and AWS.

Senior Developer
Accenture Brazil   June/2021 - Sept/2021
Development in the B2C SAP Hybris e-commerce platform, implementing new features and performing maintenance.

Senior Developer
TCE-MT   Sept/2020 - May/2021
Development of a Java Web Application (migration from a legacy Delphi application) It is a computerized system for jurisdictional entities to submit their financial statements to the TCE/MT (Court of Accounts of the State of Mato Grosso).

Mobile Developer
Ábaco Tecnologia   Feb/2020 - Sept/2020
Development of 2 educational apps, also responsible for the CI/CD and publishing.
